Why You Need a Website

Most cost-effective and wide-spread way to reach people

Right now your potential customers are online searching for products and services offered by your company.

Image: if you don't have a website you seem outdated

These days people assume that every professional company has a website.

If your site doesn't look professional you don't look professional

Potential customers judge you on appearance – the first impression may be all you've got.

Through your website anyone can find you, learn about your services and contact you at their own convenience

Your website is a self-managed store open to the public 24/7.

Our personalized service is the first thing that separates us from our competitors. We work closely with you throughout the entire process to ensure complete satisfaction with your finished website.

Increase your online visibility, enhance your professional image, and become a top contender in your industry.

Avenue Web Media understands what it takes to create an incredible website.

Why the Average Website Doesn't Work

75% Don't convey the right message

It is not enough to just have articles on a site, information must be correctly organized and categorized so people can find it and use it.

80% Of websites don't look professional

Most websites are cheaply built, and visitors respond to quality.

85% Of websites don't receive any traffic

Most web development companies don't even understand online marketing, nor offer it to their clients at any rate.

90% Of websites are not built properly

Most websites are developed using outdated technology and methods that hinder the site's potential.

Why Our Development Methods are The Best

We use the latest technology and the most effective techniques

We stay current with state-of-the-art technology and methods to guarantee the best possible results.

Very advanced functionality

Our development reach has no restrictions – if you can dream it we have already built it.

We've built websites of all sizes, no matter the complexity and requirements

From small brochure sites to full blown community portals with thousands of members, we've worked successfully on all sorts of projects.

Proper organization of content

We make sure that the information on your site is readily available and easily found by visitors as well as search engines.

From small brochure sites to full blown community portals with thousands of members, we've worked successfully on all sorts of projects. This experience gives us the edge to predict results accurately, work fast and effectively, and offer the best advice. A large percentage of our clients come to us after some other company has failed them.

We make it easy. We specialize in un-complicating the web development process. We provide a business solution that will make sense to you, with none of the headache commonly attached to tech projects.

Pro-Graphics Make Your Company Reputable

People will go with what looks best

Visitors are drawn to attractive websites.

Experienced professional designers trained for the web

We don't use just "graphics designers", we have professional web designers who understand the particulars of the field.

We will customize your design to fit the needs of your company and reflect your personal style

We build unique and attractive graphics that represent who you are.

Good design help visitors find what they are looking for

A good design is not only attractive, it also helps organize content and deliver your company's message.

Working with Avenue Web Media ensures you will receive the absolute best deal possible. Our prices are nearly half of most other professional companies, but our quality always exceeds what they offer.

How We Will Market Your Site

We guarantee quality visits to your site

We are so confident on our proven marketing techniques that we feel comfortable guaranteeing clear results.

We put your site where the right people can see it

People who are looking for your products will be directed to your site.

We will build marketing tools for your site

We will create articles, newsletters, press releases, blogs, etc, to serve as support for the marketing campaign based on our market research.

We also offer extensive marketing

Our Introductory marketing comes standard with every package, and we can offer advanced marketing to bring you as much business as you can handle.

No One Else Can:

Guarantee you a successful website

Other development companies don't guarantee success because most of their websites fail. We on the other hand guarantee success on every project.

Guarantee your complete satisfaction with the graphics and features

Other development companies focus on their pay check and do only enough to get by. Others go as far as to charge for any adjustments you request to their original design. We on the other hand are not done with any stage until you are completely satisfied.

Include free Intro Marketing to make sure the right people visit your site

Most companies don't know how to market a site, so they don't even offer marketing among their services. We on the other hand include introductory marketing with every project at no extra cost.

When other companies take up to 5 months, we take 3 - 4 weeks

Surprisingly or not, most development companies take several months to complete even small projects. Our approach to development and streamline processes result in a production cycle that can be as fast as 2 weeks in some cases.
